

SMOKING, VAPING, AND THE USE OF TOBACCO PRODUCTS**Smoking and Background**

Smoking has been identified as a significant health problem in the United States. It is a leading cause of premature death, disease, and chronic disability in our country.

Smoking can be hazardous to health for both smokers and non-smokers. For smokers, it can contribute to heart attack, stroke, high blood pressure, emphysema, and several forms of cancer. Non-smokers can be affected by breathing the toxic products that tobacco smoke adds to the air. The use of snuff and chewing tobacco can cause gum disease and oral cancer.

Thousands of Oklahoma adolescents begin smoking each year. The majority go on to become regular, adult smokers.

Purpose

The board is dedicated to providing a healthy, comfortable, and productive environment for staff, students, and citizens. The board believes that education has a central role in establishing patterns of behavior related to good health and that measures are necessary to help its students to resist tobacco use. The board is concerned about the health of its employees and also recognizes the importance of adult role-modeling for students during formative years. Therefore, the board shall discourage the use of tobacco products by its staff and students. The district will refer employees, parents/guardians, family members, and students (13 and older) interested in quitting tobacco use to the Oklahoma Tobacco Helpline and other available cessation resources.
